

Sanidhya Sahu

8871383344 | sanidhyasahu782@gmail.com | [LinkedIn](#) | Bangalore, India

SOC Analyst | Security Analyst | Blue Team Operations

CompTIA Security+ certified cybersecurity professional with hands-on SOC experience in threat detection, IOC investigation, and incident response. Proficient in Splunk, Microsoft Sentinel, Wireshark, and Wazuh. Completed 100+ TryHackMe labs with applied knowledge of MITRE ATT&CK, and EDR

EXPERIENCE

Red Team Hacker Academy

Nov 2025 – Present

Cyber Security Mentor/ Researcher | SOC & Network Analysis | Bangalore, India

- Delivered practical mentorship on SOC workflows, network analysis, and threat investigation through enterprise-style security labs.
- Performed packet inspection, IOC analysis, and protocol monitoring using Splunk, TCP/IP, DNS, and HTTP protocols through 100+ TryHackMe rooms and hands-on SOC lab environments.
- Applied MITRE ATT&CK methodologies to analyse attacker behavior, identify attack patterns, and strengthen incident investigation capabilities.

TECHNICAL SKILLS

SIEM & Monitoring: Splunk, Log Analysis, Incident Detection, Threat Monitoring, SIEM, Alert Investigation

Networking & Security Tools: Wireshark, Nmap, Nessus, Burp Suite, Metasploit, VirusTotal

Frameworks & Concepts: MITRE ATT&CK, Cyber Kill Chain, Incident Response, IDS/IPS, TCP/IP, DNS.

Programming & Automation: Python, Bash.

PROJECTS

Threat Intelligence Automation Pipeline [View Project](#)

Tools: Python · Flask · VirusTotal API · Shodan · MITRE ATT&CK

- Built an automated IOC enrichment pipeline for IPs, domains, and hashes using VirusTotal and Shodan APIs.
- Integrated MITRE ATT&CK mapping and generated threat severity reports through a Flask dashboard.

Automated OWASP Vulnerability Scanner [View Project](#)

Tools: Python · OWASP TOP 10 · Flask

- Developed a Python (Flask)-based tool to identify web vulnerabilities aligned with OWASP TOP 10.
- Automated detection of XSS, SQL Injection, and security misconfigurations, generating structured reports.
